Continuation of 11. does NOT place the application in condition for allowance because: Applicant's amendments are sufficient to overcome the rejection under 35 USC 101. However, the application is not in condition for allowance. Applicant's arguments with respect to "total steam loss" etc appear to the examiner to be imperimssibly reading limitations of the specification into the claims. Although the claims are read in light of the specification, the specification is not read into the claims. Further, the paragraphs cited by applicant do not constitute special definitions and are presented as mere examples. Thus the examiner maintains that the interpretations relied upon with respect to the prior art are the broadest reasonable interpretations as per the guidelines of the MPEP..
